

ROBERTO MANZARAZ

■ 3816683037 ✉ robertomanzaraz9@gmail.com

EDUCATION

- **Technical High School Diploma** | Escuela Técnica N°2 Lomas de Tafi (2014)
- **Higher Technician in Programming** | Instituto Teclab Siglo 21
- **Workshop:** Project Manager & Agile Methodologies
- **Scientific Computing with Python** (300-hour Certification)
- **JavaScript Algorithms and Data Structures** (300-hour Certification)
- **Responsive Web Design** (300-hour Certification)
- **Professional Internship (Práctica Profesionalizante)**
- **Problem Solving:** Application of programming logic and data structures in projects under professional standards.
- **Skill Development:** Implementation of technical solutions evaluated and approved by institutional management.
- **Work Methodologies:** Training in real development environments, ensuring code traceability and quality.

TECHNICAL SKILLS

Programming Languages: Python (Cert. 300h), JavaScript (Cert. 300h), C#, C++, Java.

Web & Frontend: HTML5, CSS3 (Tailwind CSS), Responsive Design (Cert. 300h), Web Programming.

Backend & Frameworks: .NET Core, ASP.NET Core, Entity Framework Core.

Databases: SQL, PostgreSQL, Oracle, SQL Server (Modeling & complex queries).

Cloud & Management: Cloud Practitioner, Git, GitHub, Agile Methodologies (Scrum), Configuration Management.

Systems Analysis: Information Systems Design, Requirements Gathering, Process Analysis.

Office & Analytics: Microsoft Excel (Pivot Tables & Data Analysis), Word, PowerPoint, Outlook, OneDrive.

LANGUAGES

- English: Intermediate level

PROFILE

Higher Technician in Programming and Systems Analyst in training, with a solid technical background initiated in technical secondary education and consolidated through high-volume international certifications. Specialist in developing comprehensive solutions with advanced proficiency in Python, JavaScript, and Responsive Web Design (900 certified hours by freeCodeCamp), along with strong specialization in the .NET (C#) ecosystem and relational database architectures such as PostgreSQL and Oracle. Recently completed a Professional Internship, validating the ability to lead technical problem-solving, optimize production processes, and apply agile methodologies in high-demand environments. My profile combines systems analysis rigor with technical execution capabilities to develop scalable and efficient software.

WORK EXPERIENCE

AUTOMOTIVE SALES EXECUTIVE – Car Premium

2020 – 2023

- **Data Management:** Administration of customer databases (Leads) through advanced use of dynamic spreadsheets (Excel) to optimize the sales funnel.
- **Business Intelligence:** Analysis of market trends and product performance metrics to identify strategic opportunities and improve deal closing rates.

PRODUCTION MANAGER – Tool Manufacturing Factory

2019 – 2020

- **Systems Administration:** Management of workflows and inventory control through data entry and queries in internal database systems.
- **Process Optimization:** Technical analysis of the production line to identify bottlenecks and propose improvements in operational efficiency.
- **Reporting:** Preparation of stock and production capacity reports to support managerial decision-making.

PROJECTS

Comprehensive E-commerce Platform | Full Stack Development Project

- **Data Architecture:** Design and construction of a robust relational database in PostgreSQL, using Entity Framework Core for object-relational mapping (ORM).
- **Backend Development:** Implementation of a RESTful API with ASP.NET Core (C#), integrating a security system via JWT (JSON Web Tokens) for user authentication.
- **User Experience (UX/UI):** Creation of a dynamic, fully responsive interface (Mobile-first) using JavaScript and Tailwind CSS.
- **Business Logic:** Development of critical features such as a shopping cart with data persistence (localStorage) and full inventory management (CRUD) for administrators.
- **Repository:** [github.com/RobertoManzaraz/TiendaVintageWeb.git]
